NEW

V110 Full Rugged Convertible Notebook

An effortless spin turns the V110 notebook into a rugged tablet PC. At 1.98KG and 34mm thin, it's 27% lighter and 30% thinner than the previous generation. The unit offers industry leading efficiency, extraordinary battery durability with a fanless design.

FEATURES

- Fully sealed to IP65
- Multi-touch screen
- 11.6" TFT LCD HD display
- Water resistant reversible webcam
- Integrated GPS and wireless access
- Sunlight readable technology

Z710 Fully Rugged Tablet

This fully rugged tablet raises the bar with significant improvements in screen durability and sensitivity, capacitive touch sensor and LED panel. The unique design allows the screen to be controlled with a stylus, finger or gloved hand for quick data/signature input or punched-in commands. The tablet incorporates data-capture capabilities. **ATEX certified option available.**

FEATURES

- 6 feet drop
- Fully sealed to IP65
- web cam, auto focus camera
- Extensive communication interface options
- Sunlight readable technology

PS336 Fully Rugged Handheld

The IP68 certified PS336 is a versatile fully rugged handheld. Key features include an enhanced 1GHz CPU, 600 nits super bright screen, 7-programmable quick keys and 12 hour battery life. The built-in GPS receiver, E-compass, altimeter and 5M pixels auto-focus camera with LED flash have been integrated to develop an all-in-one solution.

FEATURES

- 3.5" VGA sunlight readable TFT LCD
- Flexible connectivity option
- RS232 port & USB client
- Swapable battery technology
- Pressure sensitive touchscreen

Due to continuing developments, specifications are subject to change without notice. No liability is accepted for errors or omissions.

Rugged Mobile Computing Solutions

NEW

F110 Fully Rugged Tablet

The F110 is a true revolution in rugged tablet computing. The unit combines powerful 4th gen Intel™ core processors, the latest wireless options and a large 11.6 inch widescreen display with a thin, light design that re-defines rugged mobility.

FEATURES

- Fully sealed to IP65
- Full magnesium alloy case
- Capacitive touchscreen
- Battery swappable technology
- MIL-STD-810G certified
- Sunlight readable technology

B300 Fully Rugged Notebook

Designed to provide productive and worry-free mobile computing. The fanless design reduces the risk of failure and provides stable operation in harsh environments. Comprehensive connectivity includes bluetooth, WWAN and GPS. Advance security features ensure the safeguard of data, including finger print scanner and smart card reader.

FEATURES

- Long battery life
- Fully sealed to IP65
- Core™ i7 VPro™ processor
- Extensive I/O options
- Sunlight readable technology
- Touchscreen

X500 Mobile Server

The X500 mobile server is the world's first server-class fully rugged notebook, providing substantial data storage and enabling quick server deployment in the field where a secure network is not available. Offering high-speed performance, 16GB of RAM and up to 5TB RAID storage- it is a mobile system that combines the capabilities of a laptop and server.

FEATURES

- Intel® Core i7-820QM Processor
- 5.6" TFT LCD FHD
- Sunlight readable technology
- Backlit membrane keyboard
- Fully sealed to IP65
- Extensive I/O options
