

# APC Technology

## Keyboards, Mice and Pointing Devices Solutions

APC Technology designs and manufactures a range of rugged input devices. We are also a distributor for market-leading input device manufacturers.

Our solutions can be customised to suit the requirements of the user. This can include desktop, panel mounted or rackmount options. Manufacturing material to suit the environment, adjustment of the footprint, integration of a pointing device, choice of connectors and certification to meet client specifications. APC Technology also has a proven track record in system integration, technical support, Australian wide field services & formal testing facilities.

### IM2-IS Pointing Device

The IM2-IS is an intrinsically safe rugged pointing device designed for use in hazardous locations. The unit is an ideal solution for operator interface requirements in mining, oil and gas industries with potentially explosive atmospheres.

- Certified intrinsically safe
- Fully sealed to IP65
- Rugged construction
- Tactile feel
- PS2 or USB connection
- IECEx ia I/IIC T4 IP65
- Zone 0, Zone 1 and Zone 2
- Mounting options

### KBIM2 Keyboard

The KBIM2 is a full QWERTY PC keyboard with integral mouse designed for use in defence and industrial harsh environments. Fully sealed to IP65, the ergonomic joystick incorporates our patented opto-strain-gauge technology.

- Fully sealed to IP65
- Ergonomic
- Non-slip feet
- Mounting options
- Stainless steel option
- Choice of connectors

### KBIM2-IS Keyboard

The KBIM2-IS is a full QWERTY PC keyboard with integral mouse. The unit is intrinsically safe, connected via safety barriers and repeater, ensuring suitable for use in Zone 0 hazardous locations. The membrane is covered with a conductive stainless steel shim to prevent static build up.

- Certified intrinsically safe
- Stainless steel construction
- Fully sealed to IP65
- IECEx ia I/IIC T4 IP65
- Zone 0, Zone 1 and Zone 2
- PS2 or USB connection

## Keyboards, Mice and Pointing Devices Solutions

### KB2 Industrial Keyboard

The KB2 is a compact 82 key, full QWERTY keyboard. Designed with a tactile feedback membrane keyboard and sealed to IP65.

- Unaffected by dust or water
- Choice of connectors
- Non-slip feet
- Membrane keyboard
- Stainless steel option
- Mounting options

### PCIM Industrial Mouse

The PCIM industrial mouse is an inductive joystick that emulates a mouse. Designed to provide speed and precision, it is sealed to IP65.

- Fully sealed to IP65
- Unaffected by dust or water
- Choice of connectors
- Non-slip feet
- Stainless steel option
- Mounting options

### IM2 Industrial Mouse

The IM2 TUFSTIK is an ergonomically designed pointing device that utilises APC Technology's own patented opto-strain-gauge sensing technology. The IM2 is suited to industrial environments including foundries, food manufacturing, smelters, steelworks and public access environments.

- Sealed to IP65
- Tested for EMC CE standards
- Click in stick
- Choice of connectors
- OEM options available
- Mounting options
